

Project 25  
'Near Light'

Delivery October — November 2024

Textures, colours and the atmosphere of Iceland, where the global climate crisis can be seen and felt through its vanishing glaciers, shaped the thinking and designs for our twenty-fifth Project.

Fabric finishes and hues are informed by natural landscapes, in a thoughtfully produced collection with an ever-increasing focus on our environmental impact.

—

—

Permanent Vacation is an ongoing Project series exploring design as an expression of sentiment.

Produced responsibly in Melbourne, Australia.

PROCESS:

Permanent Vacation operates in Projects — choosing to reject the traditional fashion calendar enables us to disregard the disposable nature of the industry.

Our garments are manufactured in Melbourne in small runs. If there is a need to recut a style, following requests from customers and our stockists and only after careful consideration, we produce additional units based on demand, often extending a preorder option to calculate precisely. Through this model of utilising small runs and demand-based recuts we avoid overproduction, seasonal sales, and unnecessary industry waste.

FABRICS:

We use Melbourne-made jerseys where possible and incorporate deadstock fabrics — which have been saved from landfill — into our collections. However, due to limited local options the majority of our fabrics are sourced from knitting and weaving mills in Osaka, Japan who operate within a set of 'Sustainability Development Goals' for responsible fabric production. Yarns for our knitwear pieces are dyed and finished in Italy, using Australian merino wool.

For each new Project we calculate fabric and trim orders meticulously to ensure minimal waste and maximum usage. Any unused sampling fabrics are donated to local universities.

Each step of our production process — research and design, patternmaking, sampling, cutting and sewing, knitting, embroidery, screen-printing, dispatching — takes place either at our studio or within a 15km radius, neutralising our logistical emissions. All makers that produce Permanent Vacation pieces are paid a living wage.

1% FORTHE PLANET:

As a member of 1% for the Planet, we have committed to annually donating 1% of total sales — including online orders, popup events, and wholesale orders — to a range of environmental non-profits working across urgent areas of climate, food, land, pollution, water, and wildlife.

‘This is not philanthropy. This should be a cost of doing business. It’s paying rent for our use of the planet.’  
— Yvon Chouinard, Founder of 1% for the Planet

PACKAGING AND SHIPPING:

Permanent Vacation wholesale and online orders are wrapped using either compostable or recyclable packaging, and our brand communications including swing tags, postcards, posters, and notes are printed on either FSC certified or recycled paper.

We partner with CarbonClick to offset the carbon footprint of online purchases, assisting in the conservation of indigenous Australian forests, and enabling developing countries to harness clean and renewable energy.

Project 25  
'Near Light'

October — November 2024

—

Interconnectedness of everything

Glaciers, as the most accurate  
indicator of climate warming

The mountains are alive;  
a sense of hope.
